**Smith & Loveless to Exhibit at 2010 POWER-GEN International Conference**

LENEXA, Kan. – Smith & Loveless Inc. will exhibit at the 2010 POWER-GEN International conference in Orlando, Fla. from December 14 – 16 at booth number 4585. The company will showcase its engineered packaged systems for treating wastewater and pumping stormwater.

Specifically, Smith & Loveless will display an actual wastewater pump station, which offers power plants a compact pumping system that resides at grade level, eliminating any confined space hassles for routine inspection. Its Smith & Loveless Non-Clog Pumps are designed to last for decades, offering years of reliability and minimal operation and maintenance. Additionally, S&L will present its complete line of pre-engineered wastewater treatment systems designed for sewage treatment and water reuse applications. The **TITAN MBR™** Membrane BioReactor delivers the highest quality effluent while maintaining a compact footprint.

Key staff from Smith & Loveless' industrial division will be available to discuss the company's extensive experience in the power industry. To get in touch with an S&L staff member at the conference, contact Steve Smith at [ssmith@smithandloveless.com](mailto:ssmith@smithandloveless.com).

Founded in 1946, Smith & Loveless Inc. is a global leader in the water and wastewater industry, offering a complete line of equipment and boasting installations in more than 70 nations around the world.
